

GREEN STAR: GREEN skills for enterprises Sustainable Training for Automotive suppliers cluster

Launch Conference 10th of December 2013

9.00 - 13.00, VEGA PARK

Aula Magna, building Lybra - Marghera (VE), Italy

THE PROJECT

GREEN STAR aims to support the systemic change toward **eco-innovation** in the cluster of **automotive suppliers**, mainly SMES, by transferring the Leonardo DOI “**GT-VET**” **Sustainable Training Module** for the European Steel Industry (Large Enterprises) and the Blueprint for the implementation process of green skills for the industry in coherence with different national VET systems in Italy, Spain and Romania.

Technical workers and apprentices in SMEs will be provided with knowledge and skills to manage and implement smart and sustainable growth.

Intermediate outcomes include the two Focus Groups to promote the cooperation among VET, work systems and Triple Helix stakeholders to co-create a Sustainable Training Module for Automotive Cluster suppliers and adopt a **cluster-driven approach to VET**. Tangible outcomes are the Local Stakeholders Action Plans to **test the adapted Sustainable module**, the final Scientific publication and the related abstracts in 4 national languages.
